only **£200 + VAT**

**AND**

*Non-BDA Members*

**£500 + VAT**

The geotechnical industry, like the wider construction sector, is evolving. New technologies are emerging all the time and their impact is shaping the way we both work and interact with clients and with the environment itself. Add legislation and working practices into the mix and the stage is set for a potentially challenging future.

However, for those drillers that embrace as well as seek to understand change, the future is full of opportunity and that means profit!

**See the solutions that are defining the future of the geotechnical sector.** Speakers from: Arup; HS2; Bentley Software Systems; GCG and others will present their view of the evolving nature of the geotechnical sector, including automation, software developments, BS/EC Standards and their impact on major projects such as HS2.

**Registration: 12.30pm. Speakers: 1pm - 5.30pm with 30 min coffee and networking break, followed at 5:30pm by canapés, drinks & further networking opportunity.**
